Forecast For Northeast England
Issued by Met Office Exeter
at 0400 on Wednesday 23 Jun 2021

++ Valid for broadcast between 0600 and 1800

Headline:
Cloudy and damp in west today. Brighter and warmer elsewhere.

Today:
Cloud will increase from the northwest during the day, which will bring some outbreaks of patchy light rain and drizzle at times, mainly in the west and on hills. Drier, brighter and warmer in the east, with some sunny spells. Maximum temperature 21 deg C (70 deg F).

Tonight:
Cloudy with some light rain and drizzle, mainly in the west and over the hills. Drier in the east, with occasional clear spells. A milder night compared to previous night. Minimum temperature 11 deg C (52 deg F).

Thursday:
A cloudy and damp start in places. Brightening up through the day, with some sunny spells developing in the afternoon. Feeling warmer. Cloud and rain arriving from northwest overnight. Maximum temperature 23 deg C (73 deg F).

Outlook for Friday to Sunday:
Unsettled, with mixture of sunny spells and showers on Friday and Saturday, these will be heavy at times. Further showers likely on Sunday. Cool at first, feeling warmer on Sunday.
